

OLADIMEJI SUNDAY MICHAEL

Agricultural & Environmental Engineer | Geospatial Analysis & Sustainable Systems Design

Abuja, FCT, Nigeria | +234 813 595 3869 | oladimejismage2019@futa.edu.ng | LinkedIn: Oladimeji Sunday Michael

RESEARCH PROFILE

First Class Agricultural and Environmental Engineering graduate (rank 1 of 78, Best Graduating Student) with hands-on experience in geospatial analysis, field research, and sustainable systems design. Skilled in georeferenced field surveying, GIS-based spatial analysis, and applied agricultural research through an internship at the International Institute of Tropical Agriculture (IITA). Seeking opportunities in research, project implementation, or graduate study that draw on strong analytical, technical, and project-management abilities.

EDUCATION

B.Eng. Agricultural & Environmental Engineering — First Class Honours

09.2019 – 09.2025

Federal University of Technology, Akure (FUTA), Nigeria

- **Final CGPA:** 4.77/5.00 — **Class Rank:** 1/78 (Best Graduating Student)
- **Thesis:** Design Modification and Performance Evaluation of a Rotary Weeder (Distinction)
 - Modelled and simulated gear-train modifications in SolidWorks/AutoCAD to improve mechanical efficiency and enable hybrid power integration
 - Conducted field performance trials, achieving 60–70% weed-removal efficiency across trial plots
 - Proposed evidence-based design modifications to improve sustainability and reduce operator fatigue

RESEARCH & PROFESSIONAL EXPERIENCE

Research & Mechanization Intern

07.2024 – 12.2024

International Institute of Tropical Agriculture (IITA), Abuja, Nigeria

- Conducted georeferenced soil surveys and precision land levelling across 12+ research plots using RTK-GPS and QGIS, improving field-data accuracy for downstream irrigation planning
- Designed and installed low-cost drip irrigation and surface drainage systems across soybean fields, improving water distribution uniformity and reducing manual irrigation labour
- Co-authored an internal IITA research report on scalable mechanization pathways for Nigerian smallholder farmers, informing future field-deployment strategy
- Applied sustainable agricultural systems principles and data-driven farm management through hands-on equipment operation and field-level decision-making

Site Manager

01.2026 – 06.2026

Tagvia Ltd, Abuja, Nigeria

- Supervised and coordinated site workers and subcontractors to ensure daily construction targets were met
- Monitored construction activities to ensure compliance with project specifications, safety standards, and timelines
- Managed procurement and supply of construction materials, minimizing delays and material shortages
- Oversaw interior decoration works including POP ceiling installation, polystyrene fitting, and painting, ensuring quality finishing standards were met
- Coordinated between clients, contractors, and workers to ensure smooth project execution

REPORTS & WRITTEN OUTPUT

- Co-author, "Scalable Mechanization Pathways for Nigerian Smallholder Farmers" — internal research report, IITA, 2024
- **Departmental Seminar:** "Status of Mechanical Weed Control Methods", AGE Dept., FUTA, 2025
- **Undergraduate Thesis:** "Design Modification and Performance Evaluation of a Rotary Weeder," FUTA, 2025

AWARDS & HONOURS

- Best Graduating Student — Department of Agricultural & Environmental Engineering, FUTA, 2024
- Prince Adegbule Adesida Memorial Prize for Best Graduating Student in Agricultural Engineering, FUTA, 2024

TECHNICAL SKILLS

- **Geospatial & Field Methods:** QGIS, RTK-GPS surveying, GIS spatial analysis
- **Design & Modelling:** AutoCAD, SolidWorks
- **Programming:** Python
- **Software:** MS Office Suite (Excel, PowerPoint, Word), Google Workspace (Sheets, Docs)
- **Languages:** English (Fluent)

CERTIFICATIONS

- Fundamentals of GIS — University of California, Davis (Coursera), 2025–2026

LEADERSHIP & SERVICE

Course Representative, Mathematics-Related Courses

2019 – 2025

Federal University of Technology, Akure (FUTA)

- Mentored 200+ students across multiple academic levels over 5 years, serving as primary liaison between student body and faculty to resolve academic concerns
- Organized and led structured study groups department-wide, contributing to measurable improvement in peer academic performance
